

# Population Health Management

Best Practices™  
Certified

## COMPREHENSIVE CLINICAL RISK MANAGEMENT SOLUTION

*Enhance Quality of Care. Optimize Patient Population Management. Generate NEW Revenues.*

This Comprehensive Clinical Risk Management Solution delivers an integrated approach that easily allows healthcare practitioners (HCPs) to provide the annual wellness visit (AWV) and automated care management to patients with minimal impact on current workflow and resources. With this fully integrated solution, providers will realize significant financial benefit in both fee for service and value based reimbursement models.

### OFFERING

Automates AWV using iPads for self-assessment, while waiting to see physician

Features a proprietary advanced Decision Support System (Clinical Triggers™)

Facilitates Medicare Advantage Plans meeting required Medicare 5-Star Certification measures

Care Management uses 100% US based RN's to offer a high-touch and personalized solution to patients

Promotes behavioral change and helps manage chronic conditions 24/7

Auto-tracking of care time for reimbursement compliance and real-time feedback

Care Management provides proactive patient monitoring serving as office practice extensions through phones

Care Management provides patient-centered care plan generation and personalization

Provides significant new revenues in both fee for service AND value-based reimbursement

COMPLETE SOLUTION

### RESULTS

Optimizes patient participation in Annual Wellness Visits (85%+)

Provides prospective data; provides predictive analysis, supported by evidenced based protocols

Identifies hidden risks with "invisible population" that are often overlooked (no claims/historical data)

Promotes HCC Risk Adjustment codes for physicians, Medicare Advantage Plans

Identifies Preventive Services based on wellness data

Provides data for clinical measures required for MACRA

Provides a way to pay for care coordinators which are mission critical for success
