

TRANSCRIPTION ACCOUNTABILITY

Efficiently manage in-house, out-sourced & speech recognition programs while reducing costs and improving patient care quality.

Historically reduces transcription costs by at least 17%

Historically reduces transcription costs by at least 17%

Predictability, Visibility, Transparency

Our Transcription Accountability Management Solution is a powerful dictation/transcription and speech recognition workflow application that provides a broad spectrum of capabilities for managing the administrative and operational requirements of the medical document creation process. Using automation based transcription management principles, a unique business solution is provided to achieve flexibility, risk reduction, predictable performance, ease of contracting and cost savings.

PROGRAM FEATURES:

- Rules based multi-organizational workflow, dictation and document tracking and management.
- Advanced outsource and subcontract management module.
- Sophisticated line counting, with standardization and calibration.
- Extensive data analysis and reporting capabilities.
- Billing software that tracks transcription service utilization at the facility, department, location, and author levels.
- Integrated speech recognition services.
- Unparalleled security measures that ensure role-based access control, Protected Health Information (PHI), activity logs and myriad other measures that meet compliance requirements.

PROGRAM HIGHLIGHTS:

- **Definitive Control**—maintains complete control and accountability over document creation and management processes, PHI, and compliance with unparalleled user interface and data organization.
- **Greater Savings**—delivers optimal savings from proper structuring of transcription operations. The usage based fee structure eliminates capital costs and delivers advanced proprietary technology that is continuously upgraded and professionally supported.
- **Universal Quality**—standardizes account specifications, sets uniform templates, controls security and privacy policies, reduces manual effort, and extends operational methods uniformly to current in-house and outsourced services.
