UNIFIED CARE COORDINATION SOLUTION
FOR POPULATION HEALTH

Today, healthcare is substantially impacted by the inherent challenges of care coordination and knowledge sharing across the care continuum which ultimately drives substantial cost and dissatisfaction. ***MDR's™*** Best Practices™ Partner solves this challenge by empowering collaboration using the smart phone and tablet. Our Partner's solution drives tremendous value by maximizing the clinical effectiveness of care teams; extending services of clinicians; reducing avoidable readmissions; making population health actionable; and lowering the cost of chronic disease management through the promise of patient centered care.

Our Partner's solution is the most comprehensive Unified Healthcare Collaboration Tool combining asynchronous messaging, live telehealth and automated guidance in an end-to-end HIPAA compliant tool to transform the way healthcare is delivered today.

SOLUTION FEATURES:

➢ Instantly turn any Smart Phone or Tablet into a Unified Healthcare Collaboration Tool

➢ Virtually extend care providers enabling greater coverage and scalability

➢ Enhance outcomes through patient-centric collaboration across settings of care

➢ Strengthen patient engagement and improve compliance with Automated Guidance

➢ Offers a single rapidly deployable platform for HIPAA compliant digital health from asynchronous messaging to live multi-party telehealth sessions

SOLUTION BENEFITS:

➢ Reduce avoidable readmissions

➢ Discharge to optimal post-acute settings/providers

➢ Reinforce appropriate level of care and manage transitions

➢ Reinforce appropriate resource/equipment utilization

➢ Extend and scale services to a larger patient population

➢ Increase patient/family engagement and compliance

➢ Enable remote comprehensive triage to appropriate care settings

➢ Extend reach of hub hospitals to increase patient referrals

➢ Empower risk escalation for early intervention

Empowering patient-centric collaboration by transforming the healthcare communication experience to create value across settings of care

✓ *Reduce Flow Disruptions*

✓ *Promote Best Practices*

✓ *Minimize Readmissions*

✓ *Enhance Outcomes*
